

Business DSL Packages

Reliable Internet Access with Secure Connections

EasyStreet® Online Services, Inc. focuses on reliable high-performance Internet services with three comprehensive DSL packages to meet various business environments and needs. EasyStreet is connected to Qwest® and Verizon® phone services with high-speed DS-3 (45 Mbps) circuits for DSL traffic. The high quality of equipment for DSL service means EasyStreet can manage thousands of accounts, provide appropriate quality of service and keep costs down.

BUSINESS DSL OPTIONS

EasyStreet DSL for the Small Office/Home Office

Designed specifically for the small operation in need of a business Internet presence, the DSL Small Office/Home Office (SOHO) service is ideal if there's just you or a handful of folks in the office and you need a business Internet connection. It includes an unlimited access account with a protected static IP address.

EasyStreet DSL for the Small Office LAN

The Small Office LAN package is for businesses large enough to have a local area network (LAN) connecting their computers. This service allows one high-speed connection to be simultaneously used by multiple employees without any per-user charges. One static unfiltered IP address is included, enabling you to run your own server(s).

Use your local area network (LAN) to provide fast, shareable Internet access that grows with your business. This economical service uses one, four or eight unfiltered, static IP addresses, enabling you to run your own servers — including mail servers, such as Microsoft® Exchange®.

EasyStreet Corporate LAN Connection

The Corporate LAN Connection is for the medium-sized business that demands the best possible performance, without the cost of a frame relay or dedicated T1 connection. The Corporate LAN Connection package is similar to our Small Office LAN, but with a static IP routed subnet.

DSL PRICING

Pricing for EasyStreet's DSL service varies depending on the speed of service and your telco provider (Qwest or Verizon).

There is a monthly ISP charge to EasyStreet for the Internet service (see pricing charts) and a monthly circuit charge to the phone company for the DSL service on your phone line.

DSL AVAILABILITY

To find out if DSL is available at your location, and at what speeds, visit our website at http://easystreet.com/for_businesses/internet_access/dsl/availability/.

LEGENDARY ON-SITE SUPPORT

As always, EasyStreet technical support is available 24/7. Simply call 503-906-7400 or send an email to support@easystreet.com for around-the-clock assistance.

For more information about our DSL packages or other EasyStreet services, contact us at 503-646-8400 or visit www.easystreet.com.
