

Sustainability: More than our logo is green

EasyStreet is committed to becoming a more sustainable business. We recognize that caring for the environment is crucial to our employees, our customers, and Oregon's economy and livability. We are actively working to mitigate the environmental consequences of energy consumption that go hand-in-hand with being a thriving Data Center and Managed Services Provider.

RENEWABLE WIND POWER

Data centers are energy-intensive facilities, today representing 1.5 percent of total US electricity consumption — and that could double in the next five years. So it is no small achievement that EasyStreet now uses 100 percent PGE (Portland General Electric) Clean WindSM power in our data center. This commitment makes us a Platinum-level PGE Clean Wind Partner.

Here are a few other ways EasyStreet approaches sustainability:

- A "Green Team" meets regularly to work on sustainability issues. The team includes our CEO, several executives, managers and staff members from all departments
- We are members of the Westside Transportation Alliance
- All employees receive annual TriMet passes
- The League of American Bicyclists

has designated EasyStreet a Bicycle Friendly Business at the Bronze level

- We employ Espresso Business Services, a local environmentally-friendly cleaning service.
- Our open office design has environmental benefits, including an abundant use of skylights and dual-pane windows to minimize the use of artificial lights
- All conference room tables and chairs are from HON, a "green" furniture company
- We use high-efficiency bathroom fixtures (including motion-sensing water faucets)
- We use fluorescent and Compact Fluorescent Lights (CFL)
- We turn off all unused lights overnight
- We have replaced CRT monitors with LCD screens
- We purchase EPEAT-certified equipment whenever possible
- We use filtered tap water instead of bottled water

- A full kitchen with washable tableware instead of plastic and paper reduces waste
- We use green dishwasher soap and recycled paper towels and hand towels
- We have installed a compost bin and planted a container garden
- We have a thorough recycling program with a high participation rate and use 100 percent post-consumer paper for routine office printing
- We use an extensive intranet rather than printed manuals to document company procedures

EasyStreet is actively investigating additional steps toward sustainability. We welcome your questions and suggestions. To learn more, go to easystreet.com/about/sustainability.
